

About us

M/s Ispat Trading Corporation was established as a proprietorship firm by Mr. Neelmani Chandgothia in 1988. With over 25 years of experience, we are obliged to introduce ourselves as among the oldest traders of mild steel and other related materials across India.

We procure material directly from renowned manufacturers and dealers of SAIL, Jindal Steel, and RINL etc. and supply to large industrial units across India. With our branch offices at multiple locations (Delhi, Haryana and Rajasthan) across states, we try to serve our customers with the best price and terms in the shortest possible turnaround time. Our customers range from large scale industries in Rajasthan & Faridabad to power projects in Raipur & Telangana.

Our Customers

Power Projects

We constantly supply steel in some of the biggest power plant across India. Some of the power plants we are associated with are NTPC, RRUVNL, TSGENCO, Haryana Electricity board etc

Engineering & Infrastructure companies:

Some of the most prominent large scale engineering and construction companies engaged in construction of conveying equipments, clean energy equipments, mining equipments etc. are associated with us.

We regularly supply materials for road and rail infrastructure development. We have supplied material either directly or indirectly for projects like Delhi Metro, National Highway constructions, Flyover constructions across India.

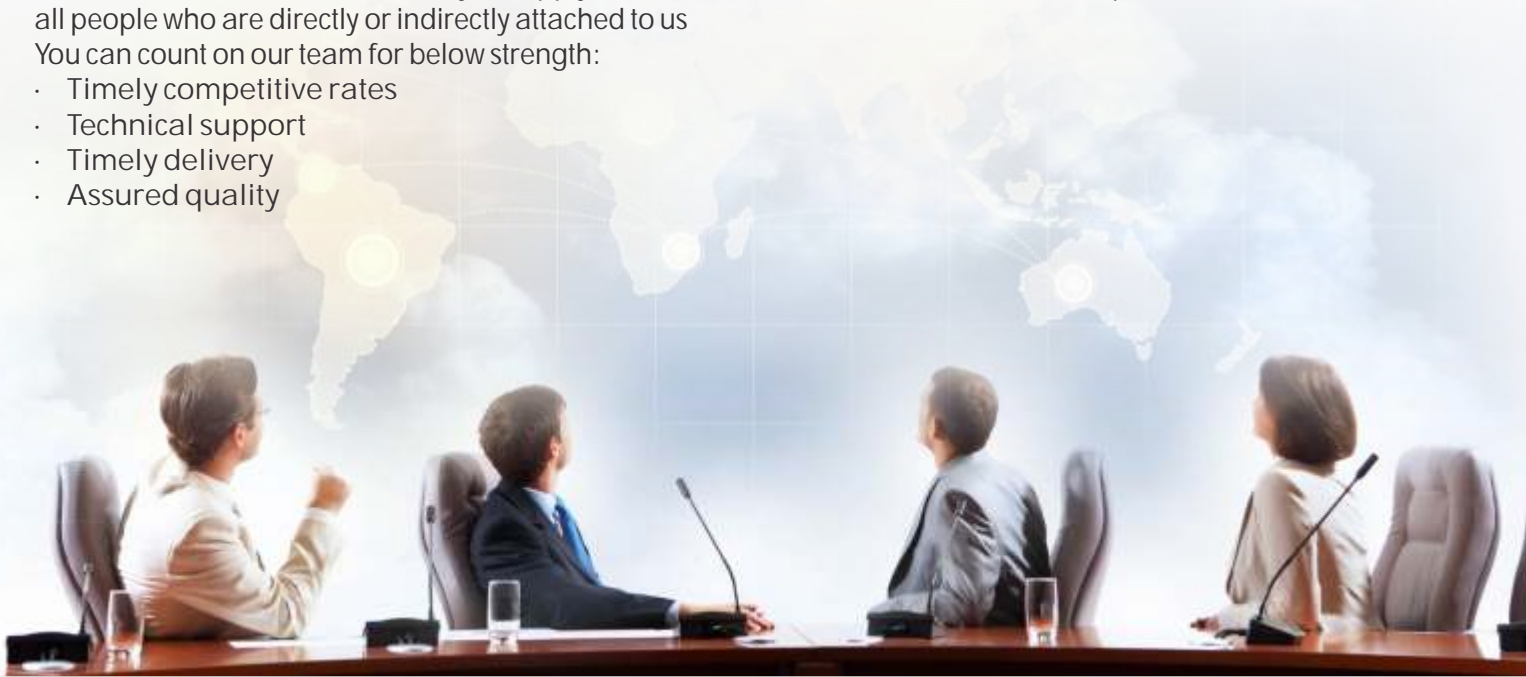

Other Manufacturing Companies: Other manufacturing companies such as those engaged in manufacturing cement, glass, tiles, cranes etc. buy material from us regularly to either use it as raw material for their product or for maintenance purposes.

Our Team

Ispat Trading Corporation team is aligned to create value for customer. We as a team believe in fulfilling core vision of organization which is "Realizing visions by partnering with people to provide exceptional value in product and services". We are here not only to supply material but we are also here to stand as partner to realize vision of all people who are directly or indirectly attached to us
